Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, and 20-25 drawn to a method of shopping on the Internet, classified in class 705, subclass 26.
- II. Claim 13-19, drawn to system comprising a sessions manager that handles interactions between a shopper and a hosting server over a computer network, classified in class 705, subclass 26.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as an ad generator. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
